Why Synapse?

Medium-sized businesses are supporting pillars of the economy. These businesses need tried and tested products, a partner who is able to satisfy their requirements and that, if possible, within a short period and with a perfect price/performance ratio. Expertise, such as comprehensive business knowledge and many years of experience when dealing with medium-sized businesses as well as the service and support quality, the ROI, the continuing personal cooperation and the guaranteed future of the IT provider are of importance. As medium-sized businesses are more gradually integrated into worldwide operating company networks, they require tailored software, a good know-how of the industry sector, as well as a sophisticated, efficient operating partner network. We are able to understand medium-sized businesses and their demands, knows how to deal with them and has many years of experience.
